

Abstract

A coin bank includes a housing having a coin receiving area for receiving unsorted coins, a coin sorting area for sorting the unsorted coins and a coin storage area for storing sorted coins. The coin storage area includes a drawer slidably mounted in the housing and a coin tube support movably mounted in the drawer between a first position, when the drawer is fully retracted into the housing and a second position, when the drawer is fully extended from the housing. A plurality of coin tubes is mounted in the coin tube support for holding sorted coins. The plurality of coin tubes is inclined in relation to a vertical axis for receiving sorted coins when the drawer is in a retracted position. A reservoir is located directly above each of the coin tubes for holding at least one additional coin above a stack of coins completely filling the coin tube.
